

# Digital Photography

Information for Learners, Families and Carers

Come and join our digital photography group. We are usually a group of 7-8 learners. We have fun experimenting with a variety of camera settings and camera angles on a variety of subjects. If you like taking photographs and want to learn a bit more about preparing them for print or even changing them to black and white then come along and join in.

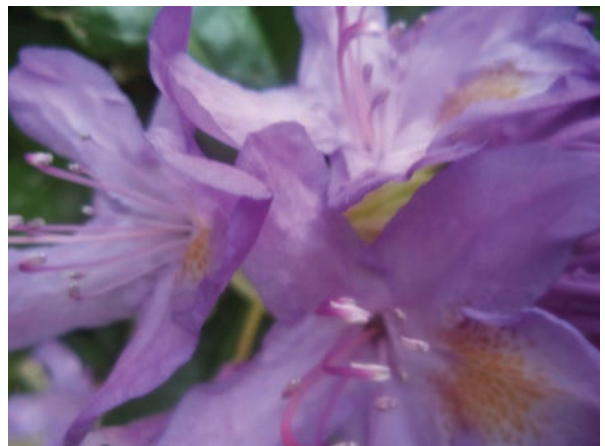

What we do depends on what the learners can do and what they are interested in.

Activities we will do include:

- Taking photographs of something close up
- Taking a “selfie”
- Portrait and landscape view
- Taking photographs of other learners in the classroom
- Using Microsoft Word
- Saving photographs to an external device
- Creating a poster
- Creating a digital photo album
- Celebrating cultural festivals
